Course Title: NURS 220.3 – Concepts of Patient and Family Centered Care
Pre-Requisites: NURS 200.3, NURS 201.3, NURS 202.3, NURS 203.3, NURS 204.3, NURS 205.3, PHAR 250.3, PHSI 208.6, MCIM 224.3

Course Description:

This course will provide opportunities for students to explore clinical competencies necessary for developing and planning care of patients with acute and chronic needs. Opportunities will be provided to demonstrate critical thinking in the performance of nursing interventions in simulated clinical situations.

Intent:

Learners will:

1. Demonstrate safety measures to protect self, colleagues, and clients from injury and infection.
2. Practice appropriate nursing interventions in laboratory settings.
3. Demonstrate knowledge and skills for safe administration of medications.
4. Use critical thinking skills to support professional judgement and decision making to develop plans of care

Content:

- Safe and competent practice
- Evidence informed practice and quality improvement
