Telephone: (306) 966-6221 Facsimile: (306) 966-6621

Established in 1938, the College of Nursing offers high quality student-centered undergraduate education and graduate programs. The College of Nursing is proud to have one of the largest Aboriginal nursing enrollments in Canada.

Instructor Positions

To meet the dynamic and exciting growth in our nursing programs, the College of Nursing is looking for **Lab, Clinical, and Classroom Instructors**.

Job Profile and General Responsibilities

- Attend the College of Nursing orientation session for new instructors during the first year hired.
- Attend student course orientations and instructor course meetings at the beginning of the term and throughout as necessary.
- Promote student learning in the psychomotor, cognitive and attitudinal domains.
- Consult with the course coordinator to ensure a safe, meaningful and effective learning experience for students.
- Consult with the course coordinator in a timely fashion when issues arise regarding student performance.
- Assess student progress and performance in relation to the course objectives, literal descriptors and professional standards, verbally and in writing throughout the clinical rotation, using both formative (ongoing) and summative evaluations, taking into consideration input from agency staff and student where applicable.
- Maintain accurate documentation of student progress.
- Evaluate/mark assignments related to the course.
- Submit a written mid-term and final evaluation to the course coordinator.
- Maintain communication with other members of the course team.
- Participate in the course and teacher evaluation processes.
- Participate in the College of Nursing annual professional development day in the spring of each academic year.

Clinical/Lab Responsibilities (where applicable to individual contract workload)

- Provide students with an orientation to the clinical area/lab/preceptorship.
- Assist with clinical laboratory simulation and clinical examinations where applicable.
- Select suitable clinical learning experiences for students, bearing in mind the course objectives, learning needs and skill levels of the students, policies of the clinical agency (where applicable) and policies of the College of Nursing.
- Maintain a positive relationship with the clinical agency and staff.
- Assist students to prepare for the nursing care they will be providing.

- **Demonstrate clinical skills as necessary.**
- **Work with students as they provide nursing care, supervising as necessary, promoting client and student safety.**

Qualifications

- **Master's preferred, BSN and minimum two years clinical experience**
- **Current Registration with the SRNA**
- **References that can comment on clinical competence**
- **Demonstrate a keen interest in nursing, teaching and learning and mentoring students**

To apply or learn more about these positions, please email nursing_clinicalcoordinator@usask.ca. In the subject line of your email, please include the College of Nursing sites (Saskatoon, Regina, Prince Albert, Yorkton & North) you would like to be considered for.
