About this Handbook

This handbook is intended to provide answers for many of the frequently asked questions by the students in the College of Nursing. It will be of great practical benefit during your time as an undergraduate student. The handbook contains invaluable information about examinations and what is required as you progress towards graduation. It will act as a pointer towards useful resources should you encounter any problems. The student handbook also includes regulations and policies that apply to College of Nursing students. This handbook is updated annually, so please take time to review the handbook annually.

BSN Students at Yorkton Site

Message from the Dean

Welcome to the University of Saskatchewan (USask) College of Nursing for the 2024-2025 academic year.

Today, as nursing students entering your first year in the Bachelor of Science in Nursing (BSN) program, you join a large community of nurses who have come before you. USask College of Nursing has over 10,500 alumni and counting! Established in 1938, our long, prosperous history positions us as a leader in nursing education and research not only in Saskatchewan, but in Canada and the world.

Our Learn Where You Live model for our BSN program means we are not only welcoming nursing students at the University of Saskatchewan campus in Saskatoon or the University of Saskatchewan campus in Prince Albert, but at distributed sites throughout the province. You are entering the BSN program with students in Saskatoon, Prince Albert, Yorkton, La Ronge, Île-à-la-Crosse, Lloydminster, and new this fall - North Battleford and Muenster! The USask motto is “Be What the World Needs”. Now, more than ever, the world needs registered nurses.

For you, our BSN Class of 2027, you will become the registered nurse with the ability to change people’s lives for the better. This responsibility will change not only your life, but the lives of those around you.

The College of Nursing’s commitment to rural and remote community engagement and our strong relationships with Indigenous communities throughout Saskatchewan shapes our approach to nursing education. We are proud to have the largest number of self-declared Indigenous nursing students in Canada.

College of Nursing faculty, the majority of whom are PhD prepared, have decades of clinical nursing experience and valuable research knowledge they are eager to pass along to you. Our clinical and community partners will embrace you in your experiences and are committed to teaching you how to provide high-quality care to patients, families, and communities.

College of Nursing staff are here to help you along your way with everything from academic advising to ensuring you fulfill your clinical requirements.

You will learn more about yourself with each passing year in the BSN program and will be forever impacted by the experiences of working with patients, families, and communities as you complete your program. Strive for excellence every day and kindness in your interactions with others.

I wish you well in your undergraduate nursing program and look forward to hearing from you throughout your journey to becoming a member of the esteemed nursing profession.

Sincerely,

Dr. Solina Richter DCur, RN
Dean and Professor, College of Nursing

Introduction

Philosophy Statement

Nursing is a respected and caring human endeavor; a distinct health profession; and an applied discipline based on nursing and related theories. Nursing is dedicated to the purposeful, collaborative relationship with individuals, families and communities that enables the acquisition, organization and use of nursing and other related resources that people need to optimize their health experiences within complex, diverse, and dynamic environments.

Embedded in a research-intensive Canadian university, the College of Nursing is situated on the territory of Treaties 4, 6, 10, and the homeland of the Métis. The College of Nursing, University of Saskatchewan, believes the discovery, advancement, and transmission of nursing knowledge is achieved through the integration of teaching, research/scholarship, evidence informed practice and service. Learning is the process of co-creating meaning that transforms experiences into shared knowledge. We value diversity, social justice and ethical practice. We foster collaboration through primary healthcare, practical innovations and technology mediated solutions, with specific consideration of the needs of rural, remote, and Indigenous communities.

The College of Nursing and our graduates are leaders in engaging individuals, families, communities, policy makers, other health professions and disciplines, and other stakeholders to provide safe, competent care that maximizes the potential of people and health systems. Through these combined efforts, we create, support, and share equitable and

sustainable solutions that improve health experiences and measurable outcomes. Solutions have local, national, and international relevance.

Vision, Mission and Values

Our Vision

The College of Nursing is a world leader in educating nurses in inter-professional health care, research, practice, innovation, capacity building and policy development.

Our Mission

As University nursing faculty in Saskatchewan, the College of Nursing strengthens nursing, health, and the health care system through the creation and integration of knowledge from research, education and practice.

We Value

Integrity - We believe in being open and honest, in keeping our commitments, in taking responsibility for our lives and learning, and in operating in a transparent manner.

Social Justice - We believe in the value of human life, the inherent worth of the individual, the right of each individual to the attainment of a high standard of health and will work with communities to achieve these rights.

Unconditional Positive Regard - We believe that each person has a right to be treated with respect regardless of his or her life circumstances or culture.

Achieving Potential - We believe that life-long learning, risk taking, and advancing our knowledge base leads the way for empowerment

Important Dates

Please Note: Dates are subject to change and additions may be made.

AUG 31, 2024	Closing date for submission of applications for Fall Convocation
AUG 31, 2024	Last day of Summer term classes for Post Degree BSN 2023 Intake
SEP 2, 2024	Labour Day – University Closed
SEP 3, 2024	Orientation for Year 2 BSN students & NURS 450.9
SEP 4, 2024	First day of Fall term classes for BSN and PDBSN
SEP 17, 2024	Deadline for registration changes for Fall Term classes with 100% tuition credit
SEP 23, 2024	Last day to withdraw from Fall Term classes with 75% tuition credit
SEP 30, 2024	National Day for Truth and Reconciliation – University Closed
OCT 1, 2024	Last day to withdraw from Fall Term classes with 50% tuition credit
OCT 14, 2024	Thanksgiving Day – University Closed
NOV 8, 2024	Fall Term break day for all nursing students – College of Nursing only
NOV 11, 2024	Remembrance Day – University Closed
NOV 13, 2024	Fall Convocation
DEC 5, 2024	Last day of Fall term classes for BSN students
DEC 5, 2024	Last day to withdraw from Fall Term classes (including clinical courses)
DEC 7, 2024	Fall Term final examinations begin for BSN students
DEC 15, 2024	Last day of Fall term classes for Post Degree BSN 2024 intake
DEC 23, 2024	Last day of Fall term final examinations for BSN
DEC 24, 2024	Christmas Eve – University Closed
DEC 25, 2024	Christmas Day – University Closed
DEC 26, 2024	Boxing Day – University Closed
DEC 27 - 31, 2024	University Closed
JAN 1, 2025	New Year's Day – University Closed
JAN 2, 2025	Orientation for PDBSN 2025 intake
JAN 2, 2025	Classes begin for PDBSN 2024 intake
JAN 3, 2025	Orientation for NURS 450.9
JAN 6, 2025	Winter Term classes begin for BSN and PDBSN 2025 intake students
JAN 17, 2025	Deadline for registration changes for Winter Term classes with 100% tuition credit
JAN 23, 2025	Last day to withdraw from Winter term classes with 75% tuition credit
JAN 30, 2025	Last day to withdraw from Winter term classes with 50% tuition credit
FEB 17, 2025	Family Day – University Closed
FEB 17 - 21, 2025	Midterm Break – No Classes *Except for PDBSN 2025 intake*
MAR 31, 2025	Closing date for submission of applications for Spring Convocation
APR 4, 2025	Last day of Winter term classes for BSN
APR 4, 2025	Last day to withdraw from Winter Term classes (except UG clinical classes) *
APR 7, 2025	First day of Winter term final examinations for BSN
APR 18, 2025	Good Friday – University Closed
APR 30, 2025	Last day of Winter term final examinations for BSN
MAY 1, 2025	First day of Spring Term for Year 2 and Year 3 BSN students
MAY 19, 2025	Last day of Winter term classes for PDBSN 2024 intake
MAY 19, 2025	Victoria Day – University Closed
MAY 20, 2025	First day of Spring term classes for PDBSN 2024 intake
JUN 2 - 6, 2025	Spring Convocation
JUL 5, 2025	Last day of Spring Term classes for Year 2 and Year 3 BSN students
AUG 22, 2025	Last day of Spring term classes for PDBSN 2024 intake students

*Before withdrawing from a course, students are encouraged to discuss this action with their Academic Advisor.

Program Information

The University of Saskatchewan, College of Nursing, believes that baccalaureate education is required for nurses to provide safe competent care. Through the acquisition of theoretical, practical, and ethical knowledge, baccalaureate education contributes to developing knowledgeable and active practitioners committed to enhancing and transforming nursing practice for individual, family, community, and population health. The hallmark of baccalaureate education is to support the application of knowledge as action in practice (Purkis & Bjornsdottir, 2006). In this section we present the intents of the Program, the conceptual framework that is the foundation for the curriculum, and an overview of the courses required to complete the degree and meet the entry-level competencies as a graduate nurse.

Program Intents

Graduates will meet the entry-level competencies of the professional regulatory body, the College of Registered Nurses of Saskatchewan (CRNS) and the Canadian Association of Schools of Nursing (CASN). Graduates will be eligible to write the National Council Licensure Examination (NCLEX).

Graduates of our program contribute to the scholarship of the nursing profession. The Canadian Association of Schools of Nursing (CASN) defines scholarship as "a full range of intellectual and creative activities that may include the generation, validation, synthesis and/or application of knowledge to advance the teaching, research, and practice of nursing" (CASN, 2001). Unique to a practice discipline, such as nursing, CASN expects educational programs to address the scholarship of service, thus requiring graduates to use their specialized knowledge and experience outside the work setting to shape and advance the profession, and contribute to social efforts that benefit humans and society (CASN).

Upon completion of the degree, graduates with a Bachelor of Science in Nursing (BSN) are expected to function as generalists in a variety of practice settings, in partnership with individuals, families, groups and communities. They will provide safe, competent quality care in accordance with the standards of professional practice. Consistent with CASN's expectations for scholarship in a practice discipline, graduates will demonstrate a strong sense of confidence, passion and an attitude of curiosity for the profession and the

practice of nursing. Graduates will enter a knowledge intensive environment of health care and service delivery. Our program will position them to work collaboratively within an interprofessional team and to contribute to health maintenance by their ability to use critical thinking, reflection, analysis and synthesis for evidence-informed practice. Graduates will be accountable for professional behaviour as guided by the Canadian Nurses Association's Code of Ethics and CRNS provincial regulatory competencies and standards. At the time of graduation, students will be able to articulate a clear sense of the professional nursing role and scope of practice.

The College of Nursing values integrity, social justice, unconditional positive regard and achieving potential. These values are inherent in our teaching and programs of research. Learning occurs within an environment where faculty demonstrate our beliefs of "being open and honest, in keeping our commitments, in taking responsibility for our lives and learning, and in operating in a transparent manner." Students are taught the "value of human life, the inherent worth of the individual, the right of each individual to the attainment of a high standard of health and will work with communities to achieve these rights and that each person has a right to be treated with respect regardless of his or her life circumstances or culture." The BSN program is the beginning stage in achieving potential. Our faculty members share with CASN the understanding of scholarship of application as a

means to maintain competencies throughout a nurses' career. Graduates understand that nursing as a profession requires "life-long learning, risk taking, and advancing one's knowledge base leads the way for empowerment" (College of Nursing, 2008).

Graduates are taught that leadership is a fundamental competency for nursing practice. Exhibiting qualities of leadership in the delivery of care, in both formal and informal roles, and an ability to be comfortable with uncertainty and change are expected competencies.

The BSN nursing curriculum is designed for students to progress from basic understanding of nursing approaches to the ability to demonstrate adaptation and innovation from simple to complex skills. Nursing practice in every term will solidify learning and increase confidence in the students. The intent is to seek at least one interprofessional experience per term. Curricular

chairs in the health sciences colleges are always reviewing options for these opportunities. Currently there are a number of teaching projects that students can be involved in. These will continue to be offered and additional options will be developed.

Experts in disciplines for courses that are part of the nursing curriculum will teach those courses (i.e., microbiology, pharmacology, and anatomy and physiology). Application of the knowledge from these disciplines to nursing practice will be integrated in the nursing courses in the same terms these courses are taught. For instance, assessment skills are taught in the same terms as anatomy and physiology, so learning is relevant and will be more likely to be retained. To demonstrate more relevance, the assessment skills are taught in conjunction with nursing interventions appropriate to those assessment skills.

BSN Student at Lloydminster Site

Nursing BSN Program Outcomes

Graduates will...

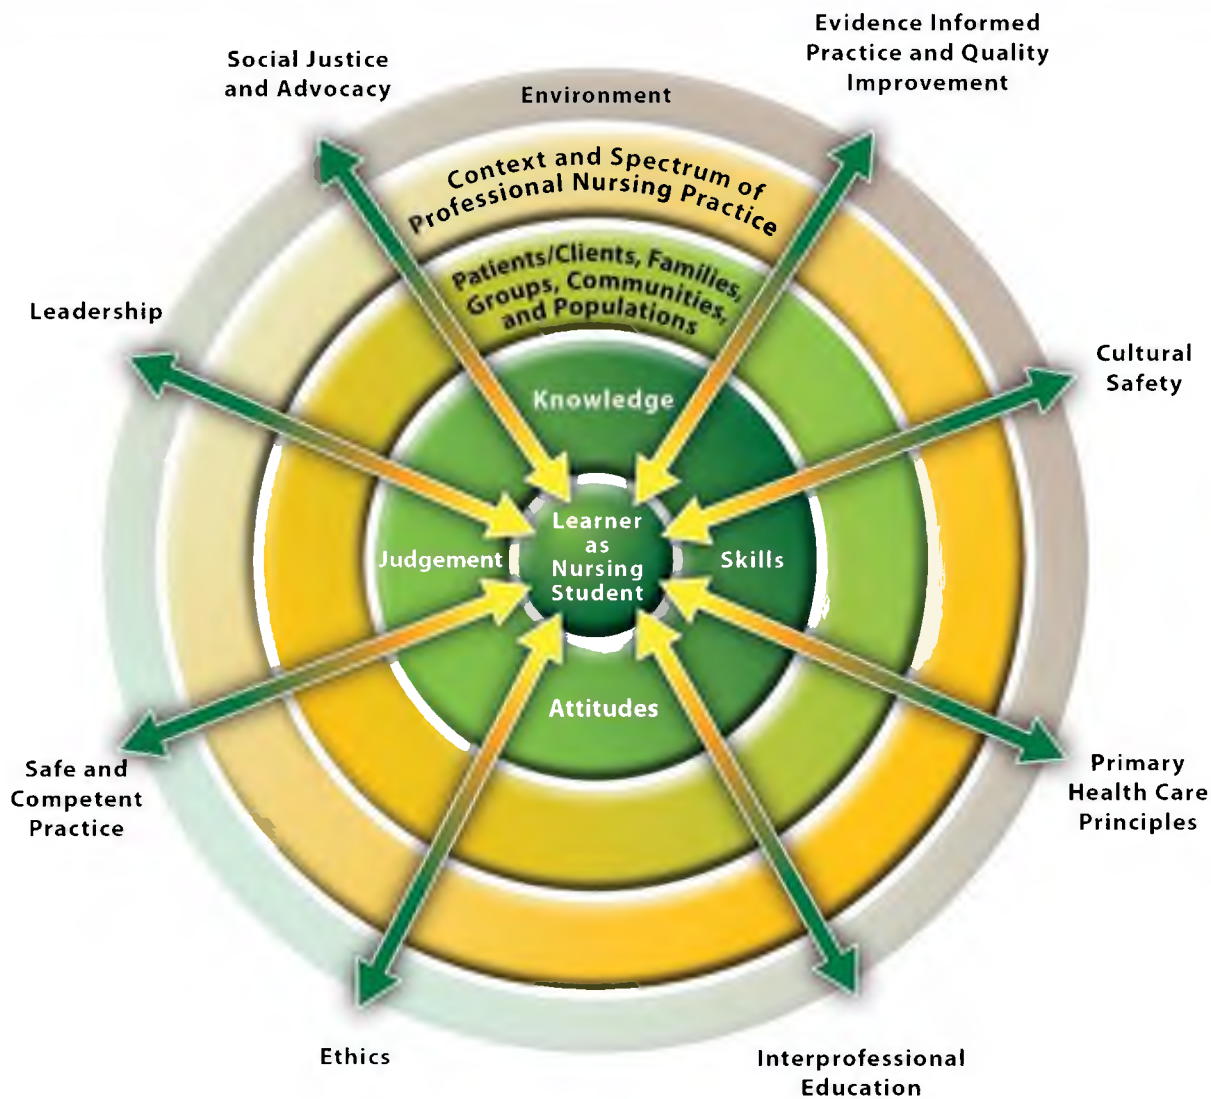

1. be prepared as generalists to function in a variety of practice settings, with diverse populations across the lifespan, in regional, national, and global contexts.
2. demonstrate caring and culturally safe and sensitive behaviors that create an environment of respect for the dignity of patients, families, and health professionals.
3. be prepared to provide compassionate, culturally safe and sensitive, relationship-centered care for diverse populations including: First Nations, Inuit, and Métis patients, their families or communities.
4. integrate critical thinking, nursing knowledge, and professional values into ethical clinical decision-making and the provision of patient care.
5. articulate a clear sense of the professional nursing role in an interprofessional team, accountability in practice, and scope of nursing practice.
6. investigate health-related social justice and advocacy concerns within legal, ethical and political context.
7. appraise and select current theory and evidenced-based knowledge to collaborate effectively within an interprofessional team to deliver safe, patient-centered care.
8. appraise and select current theory and evidenced-based knowledge to communicate with, guide, and teach individuals, families and populations regarding health promotion and illness prevention.
9. be prepared to access and utilize patient care technologies, information systems, and communication devices to achieve quality patient outcomes
10. apply leadership knowledge and ethical decision making to take on formal and informal leadership roles within healthcare systems

The College of Nursing BSN/PDBSN program is approved by the CRNS (College of Registered Nurses of Saskatchewan) and accredited by CASN (Canadian Association Schools of Nursing). All courses are mapped to the competencies of the CRNS and the standards of CASN.

Curriculum Model

Conceptual Model for Undergraduate Nursing Program
University of Saskatchewan, College of Nursing, 2011

The conceptual model for the curriculum is based on the goals of the College of Nursing, the understanding of nursing as a discipline and a profession, and the understanding of

educational theory. The model is learner centred with recognition of nursing practice areas and environments, and acknowledges the principles that will drive the curriculum.

The model also sets the stage for our teaching process and is broad enough to encourage many perspectives that will evolve during the life of the curriculum.

The conceptual model for the curriculum is congruent with the concepts of the medicine wheel, a well-known model of health among Indigenous peoples. The province has a significant number of Indigenous people, and the proportion of this population is increasing. According to the 2021 census, there are more than 187,890 Indigenous people in Saskatchewan (16.6% of the population) and this number is expected to more than double by 2050, when it is predicted that one-third of the province will be Indigenous. The number of Indigenous students in the current nursing program is the largest in the country. It is appropriate that the University of Saskatchewan College of Nursing curriculum harmonizes with Indigenous perspectives of health.

The medicine wheel represents the sacred circle of life and is organized around the four directions (east, south, west, and north) and the four layers of life, (self, family, community and nation) all of which can be seen within the curriculum framework. The inner circle represents the individual (learner) in the medicine wheel. In the second circle, the types of learning expected are placed in the directions corresponding with the four directions depicting the holistic perspective of nursing care. An explanation of why the medicine wheel is appropriate in the model of student centred learning is that the student who is placed at the centre of the learning circle will acquire and demonstrate the following components in learning: skills (EAST/ Physical dimension) will be practiced with respect, kindness and vision; attitude

(SOUTH/Emotional dimension) will be shown by honesty, in relationships developed and in time association; judgement (WEST/Mental dimension) will be demonstrated with responsibility, nurturing and reality acceptance; and knowledge (NORTH/Spiritual dimension) will be shown in efforts to seek and value intuition, wisdom and experience. The third circle represents the context of nursing practice, including the aspect of "community" in the medicine wheel. The outer circle is the societal environment in which nursing practice occurs, including, the aspect of "nation" in the medicine wheel. The medicine wheel is a framework by which individuals, families, communities, and nations can assess their level of health and wellbeing, to find a place of balance. As recognition of the history of Indigenous peoples in our province and of their continuing role, it is our intent to include Indigenous context in each nursing course in the curriculum and to prepare nurses to interact and offer respectful care.

Carper (1978) described four patterns of knowing for nursing; empiric, ethics, personal and aesthetic. All are useful in planning nursing education. Knowledge is acquired in unique ways and world views are acknowledged as influential in that acquisition. Diverse ways of being are accepted and recognized. The curriculum model fits with other world views as various cultural perspectives are incorporated into teaching modalities to respect the demographic diversity of Saskatchewan's residents as well as those in Canada. The College of Nursing's Integrated Plan includes the goal to support 'excellence in scholarship' and objective 5.10 states that "we will have a rational, consistent framework for global issues in the curricula..." The curriculum model fits with that objective as well.

Organization of Courses in the BSN Program

Year 2

Total Credit Units: 37

Fall Term (Sept-Dec)	Winter Term (Jan-Apr)	Spring Term (May-Jun)
Total Credit Units: 16	Total Credit Units: 15	Total Credit Units: 6
<ul style="list-style-type: none"> • NURS 200.3 Nursing Foundations: Perspectives and Influences • NURS 202.3 Assessment and Components of Care I • NURS 206.1 Foundational Care in Clinical Practice • NURS 204.3 Communication and Professional Relationships • NURS 207.3 Human Body Systems for Nursing 1 • MCIM 223.3 Principles of Microbiology and Immunology for Nursing 	<ul style="list-style-type: none"> • NURS 203.3 Assessment and Components of Care II • PHAR 250.3 Pharmacology for Nursing • NURS 208.3 Human Body Systems for Nursing 2 • NURS 220.3 Concepts of Patient and Family Centered Care • NURS 205.3 Research for Evidence Informed Practice (depends on campus) 	<ul style="list-style-type: none"> • NURS 201.3 Perspectives on Health, Wellness and Diversity in a Global Context • NURS 221.3 Patient and Family Centered Care in Clinical Practice

Did you know?

- ❖ Right now, you can obtain employment as a personal support worker.
- ❖ After NURS 203 is complete you can get a position as a continuing care assistant (CCA) with Saskatchewan Health Authority or at a private establishment.

Year 3

Total Credit Units: 36

Students are assigned clinical pathways in Year 3. These pathways vary by campus. Your assigned clinical pathway will indicate which theoretical and clinical classes you must register in.

Fall Term (Sept-Dec)	Winter Term (Jan-Apr)	Spring Term (May-Jun)

<ul style="list-style-type: none">• NURS 440.3 Interprofessional Perspectives: Health Systems and Policy Development within a Global Context• NURS 422.3 Issues in Leadership and Management: Transformative Practice in Health Care Organizations• NURS 430.3 Community Health Nursing: Building Partnerships• NURS 431.6 Community Nursing Practice OR <ul style="list-style-type: none">• NURS 441.3 Transitioning to Professional Practice• NURS 450.9 Practice Integration• Restricted NURS Elective.3*	OR	<ul style="list-style-type: none">• NURS 440.3 Interprofessional Perspectives: Health Systems and Policy Development within a Global Context• NURS 422.3 Issues in Leadership and Management: Transformative Practice in Health Care Organizations• NURS 430.3 Community Health Nursing: Building Partnerships• NURS 431.6 Community Nursing Practice OR <ul style="list-style-type: none">• NURS 441.3 Transitioning to Professional Practice• NURS 450.9 Practice Integration• Restricted NURS Elective.3*

*Restricted Elective – 3 credit units. The restricted elective can be completed throughout the nursing program and/or in Year 4. The list of pre-approved restricted electives to choose from can be found [here](#). To receive credit for the restricted elective it must be completed within 6 years of admission to nursing.

NOTE: Part-time study in the BSN program is an option; however, all courses must be completed within six years of entering the College of Nursing and the sample course organization above will not apply.

Organization of Courses in the PDBSN Option

The Post-Degree Bachelor of Science in Nursing (PDBSN) option recognizes previous university achievements of qualified students and gives them the opportunity to earn a Bachelor of Science in Nursing (BSN) degree in a shortened period of time. The Post-Degree BSN option provides opportunity for full-time intensive study over six consecutive terms with program completion in less than two calendar years. Please note, this is only a sample schedule and may be subject to change.

Academic Integrity

INTEGRITY DEFINED

Integrity is expected of all students in their academic work – class participation, examinations, assignments, research, practica – and in their non-academic interactions and activities.

Examples of what academic integrity means for students:

Perform your own work unless specifically instructed otherwise. Check with your instructor about whether collaboration or assistance from others is permitted.

Use your own work to complete assignments and exams.

Cite the sources when quoting or paraphrasing someone else's work. Discuss with your professor if you have any questions about whether sources require citation.

Follow examination rules.

Discuss with your professor if you are using the same material for assignments in two different courses.

Be truthful on all university forms.

What is integrity in non-academic activities:

Misconduct that disrupts the activities of the university or harms the legitimate interests of the university community could be cause for non-academic disciplinary action.

Procedures, and guiding principles:

Procedures related to integrity and misconduct are outlined in the [Regulations on Student Academic Misconduct](#) and the [Standard of Student Conduct in Non-Academic Matters](#).

Both documents are based on the following Guiding Principles from the [Policy on Student Discipline](#):

- Freedom of expression
- Commitment to non-violence
- Security and Safety
- Mutual Respect and Diversity
- Commitment to Justice and Fairness
- Integrity

ACADEMIC MISCONDUCT PROCEDURES

“Academic Misconduct” is the term the University uses to describe cheating. Types of cheating are listed in the Regulations on Student Academic Misconduct. There is an onus on every student to become informed about misconduct.

When an instructor believes a student has committed academic misconduct, the following procedures are followed:

Informal resolution:

Many cases of alleged misconduct on the part of students result from misunderstanding or carelessness and may be better addressed through informal measures.

If the student concedes the misconduct and the infraction is deemed by the instructor to be minor enough to not warrant a formal hearing, the student and the instructor may agree on a resolution, which are limited to the following:

- The grade on the work that is the subject of the infraction may be reduced by a percentage appropriate to the degree of the academic misconduct; and/or
- The student may be asked to resubmit or rewrite the examination assignment or other work.

Resolutions applied as part of the informal process do not become part of the student's permanent record, but temporary records of informal resolutions of academic misconduct are kept until the longer of: five years or until the student has completed their academic program.

When informal resolution is pursued, an [Informal Resolution of Academic Misconduct form](#) shall be completed. This form may be retained by colleges for future consideration should further incidents of misconduct occur.

Formal procedures will be followed for all allegations serious enough to require a hearing, or for those situations that cannot be resolved at the informal level.

Formal procedure:

For more serious misconduct, or in cases where the student disputes the allegation or proposed sanction, a college hearing board will hear the matter. Procedures for hearings are described in the Regulations.

The hearing board has the authority to impose one or more of the following sanctions:

- that the student be reprimanded or censured;
- that a mark of zero or other appropriate grade be assigned for the entire course, for an assignment or for an examination or assessment, and/or that a credit or mark for the class be modified or cancelled;
- that an examination be rewritten, an assignment be redone or any other academic performance be repeated;
- that the student(s) be required to submit an essay or assignment relating to the topic of academic misconduct, or to prepare and/or deliver a presentation on that or a related topic;
- that the students(s) be required to complete additional training related to academic integrity;
- that a prospective student be denied admission to the program;
- that the student(s) be suspended from USask for a specified period of time;
- that the student(s) be expelled permanently from USask; or
- that the conferral of a degree, diploma or certificate be postponed, denied or revoked.

A sanction imposed by a Hearing Board is reported to the student's college and to the university, and becomes part of the student's record. A finding of misconduct in research funded by an external agency is reported to that agency.

Further appeal of a hearing board decision or penalty is permitted only on limited grounds related to new evidence or procedural issues.

The following constitute academic misconduct that may be the subject of an allegation under the Regulations on Student Academic Misconduct:

- a) Providing false or misleading information or documentation to gain admission to USask or any USask program;
- b) Theft of lecture notes, research work, computer files, or other academic or research materials (including data) prepared by another student or an instructor or staff member;
- c) Using work done in one class in fulfilment of any requirement of another class unless approval is obtained from the instructor by whom the material is being evaluated;
- d) Colluding in the development of or completion of work, examinations and/or assessments (sometimes called unauthorized collaboration) without direction from or approval of the instructor in the class. It is not academic misconduct to use work developed in the context of a group exercise if the mode and extent of the use does not deviate from that which is specifically authorized.;
- e) Alteration or falsification of records, computer files, or any document relating to a student's academic performance, including but not limited to falsification of information provided for application to USask or any of its programs;
- f) Fabrication or invention of sources;
- g) Examinations and assessments: The following are examples of academic misconduct involving examinations and assessments:
 - (i) Failure to observe any stated rule with regard to the procedures used in an examination, assessment, or an activity undertaken for academic credit where such a failure could result in the student gaining relatively greater credit;
 - (ii) Altering answers on a returned examination;
 - (iii) When prohibited, removing an examination (including creating a digital copy) from the examination room and/or sharing examination or assessment material;
 - (iv) Seeking to acquire or acquiring prior knowledge of the contents of any examination question or paper;
 - (v) Attempting to use, possessing or using notes or other sources of information or devices not permitted by the instructor in an examination or assessment;
 - (vi) Consulting or seeking the assistance of others when writing an unsupervised (e.g., "take home") examination or assessment unless permitted by the instructor;
 - (vii) Providing false or misleading information with the intent to avoid or delay writing an examination or fulfilling any other academic requirement;
 - (viii) Failing to observe the terms of any agreement not to disclose the contents of an examination;

- (ix) Misrepresenting or conspiring with another person to misrepresent the identity of a student writing an examination or engaging in any other form of assessment;
- h) Knowingly doing anything designed to interfere with the opportunities of another person to have their contribution fully recognized or to participate in the academic program;
- i) Preventing others from fair and equal access to USask facilities or resources, including library resources;
- j) Using or attempting to use personal relationships, bribes, threats or other similarly inappropriate conduct to gain unearned grades or academic advantages;
- k) Knowingly assisting another person engaged in actions that amount to academic misconduct, including the supply of materials prepared by the student to another student for use by that student as the work or materials of that student;
- l) Plagiarism: the presentation of the work or idea of another in such a way as to give others the impression that it is the work or idea of the presenter. Adequate attribution is required. What is essential is that another person have no doubt which words or research results are the student's and which are drawn from other sources. Full explicit acknowledgement of the source of the material is required. Examples of plagiarism are:
 - (i) The use of material received or purchased from another person, website, or other source or prepared by any person other than the individual claiming to be the author. The use of material received through purchase is also known as "contract cheating."
 - (ii) The verbatim use of oral or written material without adequate attribution.
 - (iii) The paraphrasing of oral or written material of other persons without adequate attribution.
- m) Unprofessional conduct that occurs in academic or clinical settings or other work placements, or that is related to the student's area of professional practice. Professional Colleges may develop professionalism policies that define unprofessional conduct in the context of the professional programs. In Professional Colleges where the professionalism is part of the academic assessment of the student, unprofessional conduct may also be addressed through academic evaluation. Non-academic offenses are dealt with under the Standard of Student Conduct in Non-Academic Matters and Regulations and Procedures for Resolution of Complaints and Appeals.

Grading

A percentage grading system is used in the Bachelor of Science Nursing program. Academic or clinical performance meriting a particular grade is described by a term called a *literal descriptor*. The relationship between the literal descriptors and percentage grades is shown below. You will note that in each classification the last four statements are particular to the program. They are specifically, although not exclusively, designed for use in clinical and lab situations.

Literal Descriptors for Determination of Grades

Percentage	Literal Descriptor	Description
90-100	Exceptional	<p>A superior performance with consistent strong evidence of</p> <ul style="list-style-type: none"> • A comprehensive, incisive grasp of the subject matter; • An ability to make insightful critical evaluation of the material given; • An exceptional capacity for original, creative and/or logical thinking; • An excellent ability to organize, to analyze, to synthesize, to integrate ideas, and to express thoughts fluently. <ul style="list-style-type: none"> ◆ Consistent superior praxis (applying, adapting and generating knowledge in practice); ◆ Consistent accountability; ◆ Consistent insightful and effective interpersonal relationships; ◆ Consistent and appropriate self-direction.
80-89	Excellent	<p>An excellent performance with strong evidence of</p> <ul style="list-style-type: none"> • A comprehensive grasp of the subject matter; • An ability to make sound critical evaluation of the material given; • A very good capacity for original, creative, and/or logical thinking; • An excellent ability to organize, to analyze, to synthesize, to integrate ideas, and to express thought fluently. <ul style="list-style-type: none"> ◆ Superior praxis (applying, adapting and generating knowledge in practice); ◆ Consistent accountability; ◆ Consistent effective interpersonal relationships; ◆ Consistent and appropriate self-direction.
70-79	Good	<p>A good performance with evidence of</p> <ul style="list-style-type: none"> • A substantial knowledge of the subject matter; • A good understanding of the relevant issues and a good familiarity with the relevant literature and techniques; • Some capacity for original, creative and/or logical thinking; • A good ability to organize, to analyze, and to examine the subject material in a critical and constructive manner. <ul style="list-style-type: none"> ◆ Sound praxis (applying, adapting and generating knowledge in practice); ◆ Consistent accountability; ◆ Consistent effective interpersonal relationships; ◆ Decision making which required minimal support.

60-69	Satisfactory	<p>A generally satisfactory and intellectually adequate performance with evidence of</p> <ul style="list-style-type: none"> • An acceptable basic grasp of the subject material; • A fair understanding of relevant issues; • A general familiarity with the relevant literature and techniques; • An ability to develop solutions to moderately difficult problems related to the subject material; • A moderate ability to examine the material in a critical and analytical manner. <ul style="list-style-type: none"> ◆ Reasonable praxis (applying, adapting and generating knowledge in practice); ◆ Consistent accountability; ◆ Effective interpersonal relationships generally; ◆ Decision making which requires average support.
50-59	Poor - Minimal Pass	<p>A barely acceptable performance with evidence of</p> <ul style="list-style-type: none"> • A familiarity with the subject material; • Some evidence that analytical skills have been developed; • Some understanding of relevant issues; • Some familiarity with the relevant literature and techniques; • Attempts to solve moderately difficult problems related to the subject material and to examine the material in a critical and analytical manner are only partially successful. <ul style="list-style-type: none"> ◆ Inconsistent praxis (applying, adapting and generating knowledge in practice); ◆ Developing accountability; ◆ Inconsistent ability to establish effective interpersonal relationships; ◆ Decision making which requires more than average support.
<50	Failure	<p>An unacceptable performance</p> <ul style="list-style-type: none"> ◆ Poor praxis (applying, adapting and generating knowledge in practice); ◆ Lack of accountability; ◆ Inability to establish effective interpersonal relationships; ◆ Inability and/or inappropriateness in decision making.

- Denotes University of Saskatchewan general descriptors
- ◆ Denotes additional College of Nursing descriptors

Academic Regulations

Academic regulations at the University of Saskatchewan apply to all students and courses in the Bachelor of Science in Nursing (BSN) program. For general University of Saskatchewan regulations, refer to the University of Saskatchewan course catalogue. Please note: if you withdraw from a course you cannot appeal.

Procedures for Student Appeals in Academic Matters

If a student is dissatisfied with their grade, click [here](#) for information on how to question/appeal a grade.

Regulations on Student Academic Misconduct

Academic misconduct is the term the University uses to describe cheating. Types of cheating are listed in the Student Academic Misconduct Regulations. There is an onus on every student to become informed about academic misconduct. Click [here](#) for more information.

Standard of Student Conduct in Non-Academic Matters and Procedures for Resolution of Complaints and Appeals

The purpose of these [regulations and procedures](#) is not to actively monitor or control student behaviour, but rather to provide a mechanism for responding to complaints about student behaviour that violates the standard of conduct expected of students in non-academic matters.

Additional Student Fees

- NURS 200: A materials fee is attached to this course to cover the license for HESI learning resources that are used throughout the BSN program.
- NURS 202, 220, 305, 311, 312: A lab fee is attached to these courses to cover a portion of consumable supplies used by students in the nursing procedures lab.
- NURS 441: A materials fee is attached to this course to cover the license of HESI Exit Exams for NCLEX-RN preparation.

BSN Student at Lloydminster Site

Program Supplies Checklist

Program Supplies Checklist 2024

The following supplies are required prior to the start of nursing classes:

- ✓ College approved uniforms - <https://nursing.usask.ca/uniforms/overview.php>
 - To be worn at all labs and clinical
 - Students are required to have at least two uniforms

- ✓ Shoes
 - Shoes must have closed toes and closed heel with a non-slip, non-marking sole and low heel.
 - Must be easily wipe-able in the event of contamination.
 - Must be clean and in good repair
 - Footwear used in the clinical setting is not to be worn outside of the clinical setting.

- ✓ Watch with second hand or digital watch with seconds

- ✓ Penlight

- ✓ Bandage scissors

- ✓ Stethoscope
 - Single tube suggested; must have a bell and diaphragm

- ✓ APA Manual, 7th edition - <https://shop.usask.ca/Search?data=apa+manual>

- ✓ Access to a computer and internet

- ✓ Handheld mobile computing device
 - Android, iPhone, etc.

Student Support Services

Student Cards and Numbers

You will have an identification number for USask. It is your responsibility to ensure that you use the correct identification number on exams.

****NOTE:** Student identification numbers are required for all examinations.

Access and Equity Services (AES)

AES helps provide reasonable accommodations for students who experience barriers to their education on the basis of a prohibited ground(s), including disability, religion, family status, and gender identity. In order to access AES programs and supports, students must follow AES policy and procedures. For more information, check www.students.usask.ca/aes, or contact AES at 306- 966-7273 or aes@usask.ca.

Examinations with AES

Students registered with AES may request alternative arrangements for mid-term and final examinations. Students must arrange such accommodations through AES by the stated deadlines. Instructors shall provide the examinations for students who are being accommodated by the deadlines established by AES.

If you have a disability and require accommodations:

Please obtain appropriate documentation to register with AES so you can access services and programs. There are also deadlines that must be met to request exam accommodations.

- For medical-based disabilities, or pregnancy, a health care practitioner licensed to diagnose must fill out a AES Medical Questionnaire.
- For learning disabilities, submit a psycho-educational assessment completed within the last five years by a registered and fully licensed psychologist.

If you require accommodation based on your religion, family status, or gender identity, you must complete the appropriate form found on the [AES Website](#).

If you have questions regarding whether your documentation is appropriate or if you have questions regarding accommodations within other protected areas, please contact us.

Discrimination and Harassment Prevention

The University of Saskatchewan has policies regarding discrimination and harassment. For specific information, see [The University's Policy on Discrimination and Harassment](#).

Scholarships, Awards, and Bursaries

There are several scholarships, bursaries, and awards available to current students. Information is available on the College of Nursing website at [Scholarships, Bursaries & Awards](#).

Academic Advising

Current nursing students should consult an academic advisor if they have questions about their program of study, wish to complete part time studies, or to discuss any issues that may possibly impact academic success. Academic advisors assist students to interpret college policies, procedures and requirements, and support nursing students to make practical academic plans and decisions, including providing help with developing strategies to improve academic performance. Academic Advising is a partnership between the advisor and the student where both parties provide information and direction within the student's educational progression. Academic advisors help students to understand their options and access available resources and services.

To book an appointment with an advisor, visit <https://nursing.usask.ca/advising/appointments.php> or email undergradnursing.advising@usask.ca.

University of Saskatchewan Community of Indigenous Nursing (UCIN)

UCIN student advisors support Indigenous students interested in or enrolled in the University of Saskatchewan undergraduate nursing program. Nursing Advisors in Saskatoon and Prince Albert work with students from all sites to build community through gatherings and peer networks. They provide academic and personal advisement and facilitate tutoring, mentorship, and referrals to culturally appropriate supports as requested. UCIN advisors are also available to provide information and referrals for childcare, housing, funding and other concerns. UCIN promotes an “open door” philosophy and welcomes international students and non-Indigenous students to connect as well. Please feel free to stop by and see us!

To learn more: [University of Saskatchewan Community of Indigenous Nursing](#)

Student Support and Outreach

Student Affairs and Outreach at the University of Saskatchewan and the College of Nursing have partnered to provide Nursing students with direct support from a Student Support and Outreach Coordinator.

What type of support is offered?

Immediate practical support, education, coaching, mentorship, crisis intervention and management, wellness support and advising, problem-solving, resource navigation, referrals to on and off-campus resources, and ongoing follow-up care.

What types of situations can the Student Support and Outreach Coordinator assist with?

- helping students in distress or crisis
- students who would benefit from general wellness advising and support
- students who are experiencing thoughts/behaviours of suicide
- students who are hospitalized for any reason
- students who are experiencing something difficult and complex and need help.

The Student Support and Outreach Coordinator also provides support to College of Nursing staff and faculty who are concerned about a student. This is not an exhaustive list, so please [click here](#) to learn more about all available services.

The Student Support and Outreach Coordinator is available in office 1A50.5, Health Sciences Building Monday to Friday 9:00am to 4:00pm by a scheduled appointment. Please book two consecutive thirty-minute appointments to ensure you have enough time.

Our current Student Support and Outreach Coordinator is social worker, Amber Fuentealba.

If you are a College of Nursing student and would like to **book an appointment or connect with Amber**, please call (306) 966-6232, [email](#), drop in Wednesdays from 1:00-3:30, or [book online](#).

International Students

Please be advised that you must ensure that you are in compliance with all immigration requirements at all times when studying in the Nursing program at the University of Saskatchewan.

Most importantly, you are required to hold a valid passport and a valid study permit for the duration of your program. Please ensure that you reviewed the information on the ISSAC website to ensure you are in compliance.

PDBSN Students at Saskatoon Site

Policies

[Click here](#) to read more about the policies listed below:

- Access and Equity Services
- Admissions of Required to Discontinue Students
- Attendance
- Cell Phone Usage
- Completion of Work
- Confidentiality
- CPR Certification
- Criminal Record Check
- Exemption from Final Examination
- Grade Assignment
- Hand Hygiene
- Immunization
- Midterm Exam Policy
- Mobile Device Usage in Clinical Settings
- Narcotics Administration
- Patient Safety Incident
- Posting of Grades
- Processes Related to Students who Demonstrate Unsafe Practice
- Professional Appearance
- Professional Conference Attendance
- Program Completion*
 - ***NOTE: Withdrawal from a course will jeopardize your completion of the program.** In addition, withdrawal from a course may mean you do not have the necessary pre/co-requisites to continue in other courses in which you are registered (that is, you may be required to drop other courses as well). If you are considering withdrawing, you must meet with a [College of Nursing Academic Advisor](#) to discuss your situation.
 - Students who fail or withdraw from a clinical course will be required to meet with an Academic Advisor. Prior to receiving permission to repeat the clinical course, the Associate/Assistant Dean will determine what course work will be required to prepare for the next attempt at a clinical course. Please refer to the policy **Repeating a Course** in the [policy section of the website](#).
 - While we hope you will complete the program, some students, for a variety of reasons, choose not to do so. If you are considering withdrawing from the program, please contact a College of Nursing Academic Advisor. Withdrawal from the program will require that you reapply, following the application process again should you decide to return. You should be aware that readmission to the program is on a “space available” basis.
- Progression Standards for Clinical Nursing Courses
- Promotion and Graduation*
 - ***NOTE:** In order to be awarded your degree from the University of Saskatchewan, you must complete an [Application to Graduate Form](#), whether or not you plan to attend the convocation ceremony in Saskatoon. Further graduation information is available on the [Convocation website](#).
- Repeating a Course
- Respiratory Protection
- Supplemental Final Examinations
- TLR Certification

- Weighting of Course Competencies
- WHMIS
- Worker's Compensation Benefits Guidelines

Regulations

Communication

All communications (electronic or otherwise) should be clear, courteous, accurate, appropriate, and timely. Students are expected to keep their personal contact details up to date, and to know where to look for, and how to find, information relevant to them (including print material, course websites, college webpages, USask email, and other means as defined during their program).

Important information from the college administration office and from faculty instructors will be sent to students frequently throughout their time as students in the college. All such communication will be sent to students using their University of Saskatchewan email accounts at usask.ca. **It is the responsibility of students in the College of Nursing to check their USask email account on a regular basis while enrolled in programs at the college.**

If students choose to set up mail forwarding on their email account, they are responsible for ensuring that mail forwarding is set up correctly and that they are able to receive emails sent to their USask email account. It is required that students use their USask email for all electronic communication including signing up for the electronic tools used by the College of Nursing, and not another email provider such as Gmail or Hotmail.

For more information about student email accounts, please contact the [ICT Services & Support Website](#)

Deferred Final Examinations

Deferred final examinations may be granted in extenuating circumstances. Refer to the [University of Saskatchewan website](#)

Deficient Courses on Admission

BSN students can be admitted with a deficiency in one of the following pre-professional courses. This deficiency **MUST BE COMPLETED** in the first term of study once accepted to the College of Nursing.

Allowable Deficiencies are:

- INDG 107 or HIST 195
- NUTR 120
- STAT 242, 244, 245, 246 or PLSC 214 (formerly PLSC 314), COMM 104, PSY 233, SOC 225 or GE 210
- SOC 112
- NURS 120
- Social Science restricted elective

Please ensure that you complete any deficiency by December 31. Students are required to discontinue if deficiency is not completed in the first term of Nursing. Have the institution send official transcripts to admissions@usask.ca.

PDBSN students can be admitted with one deficiency in the following prerequisite courses: Social Sciences, Nutrition, or Indigenous Studies. The deficiency must be cleared by the end of April of the year you are admitted. If unofficial proof of completion is not submitted by May 31 you will not be

able to continue in your nursing studies and may have to reapply for admission. Official transcripts must be emailed to admissions@usask.ca by May 31.

****NOTE: The passing grade for students taking courses from institutions other than the USask is the passing grade of the institution offering the course.**

Digital and Social Media

As adult learners in a professional college, nursing students must be aware of and practice the highest level of confidentiality and respect regarding patients and clients they work with in clinical settings. Photographs and video recordings taken in clinical settings may result in a breach of confidentiality for the people receiving care, depending on the usage and distribution of such material. If photos or video are to be taken in a clinical setting, permission from the people involved must always be obtained either verbally or in writing and the intended use must be clearly communicated.

Discretion is important when determining appropriate usage of photos and video, as disciplinary action may result in cases of poor judgment. Students must recognize and separate the professional and community building use of digital media from the social networking and personal uses. Students should consult with faculty supervisors or their Associate/Assistant Dean for clarity on specific projects or circumstances involving the collection and use of photos or video in a clinical setting. For more information, please refer to [InfoLaw Social Media](#).

The College of Nursing has established [social media guidelines](#) for faculty, staff, and students and ask that students familiarize themselves with these guidelines.

Site Transfer

There are no transfers between sites (for current or returning students).

Smoking, Alcohol, and Substance Policy

The University policy is intended to provide a framework to establish rules, understanding and expectations regarding the use of Smoking (and the use of all Electronic Smoking Products), Alcohol, Cannabis and other Lawful Substances.

<https://policies.usask.ca/policies/health-safety-and-environment/Alcohol-Smoking-Substance.php#AuthorizationandApproval>

Social Networking

The University of Saskatchewan [Guidelines for Faculty and Students using Internet Social Networking in the Academic Context](#) were developed by a Subcommittee of the Academic Support Committee of Council.

Students are reminded there are privacy requirements, including maintaining patient/client/clinical practice confidentiality, that must be adhered to when using social network applications and web sites (e.g., blogs, Facebook, Instagram, YouTube, Tik Tok, Snap Chat, X, etc.) in association with a course. Please note postings must be professional, respectful, and appropriate. Please also note policies regarding academic integrity and provincial/federal laws may be breached if social networking is used inappropriately, whether used for a course or personal communication, resulting in serious consequences.

Please also note inappropriate use of social networking applications and websites reflects not only on the individual, but also on the program and institutions offering the program. Although there is a perception of anonymity and privacy, once a message is posted it no longer is private. For more information, please refer to the [Office of the Privacy Commissioner of Canada](#).

The College of Nursing has established [social media guidelines](#) for faculty, staff, and students and ask that students familiarize themselves with these guidelines.

Transfer Credits

Internal Transfer Credits (USask Courses)

- The Bachelor of Science in Nursing program and the curriculum is approved by the College of Registered Nurses of Saskatchewan (CRNS) and accredited by the Canadian Association of Schools of Nursing (CASN). As such, students enrolled in the College of Nursing undergraduate programs are expected to take the approved classes from the College of Nursing. Classes that are exceptions to this include: Anatomy and Physiology (NURS 207.3 and NURS 208.3), Microbiology (MCIM 223.3), Research Methods (NURS 205.3) and the Restricted Nursing Elective.3.
- Classes taken prior to admission into the College of Nursing undergraduate program will be considered for transfer credit, if less than 6 years old from time of admission.
- A grade will be assigned for credit only if the course was taken from the University of Saskatchewan. When two or more courses are used to meet the requirement of one course, a weighted average will be calculated.
- An equivalent course from USask will be considered for credit into the undergraduate nursing program as a nursing course only if the grade achieved in that course was 60% or greater

External Transfer Credits

- All courses taken from other institutions and granted transfer credit will not have a grade assigned for use in calculating averages.
- An equivalent course from another institution will be considered for transfer credit into the undergraduate nursing program only if the student received credit for the course at the other institution, and the grade achieved was 60% or greater.
- There is no course equivalency for transfer credit in the undergraduate nursing program for NURS 450.9: Practice Integration
- A standardized 5-station OSCE reflecting key skills from NURS 202.3 and/or NURS 203.3 and a Care Plan case study, with a pass of 80% or greater, will be completed as PLAR credit for all students requesting exemption from NURS 202.3 and/or 203.3.

Note: As per an existing agreement, LPN's who graduated from Saskatchewan Polytechnic after 2008, will automatically receive credit for NURS 202.3.

Clinical Experiences

Clinical and lab experiences are an integral part of the program. The University of Saskatchewan has clinical placement agreements with the major agencies in which students will have clinical experiences. All clinical experiences, regardless of where they are, will be arranged by the program. During the experiences, students will be supervised by either a College of Nursing instructor or agency staff. Although every attempt will be made to avoid changes once placements are confirmed, there are circumstances beyond our control that occur and schedules, placements, or instructors may change with very little notice. Students are expected to make the necessary arrangements to attend clinical if these changes occur. Please be available for all dates within the clinical time frame.

NOTE: Many of the policies in the previous [policy](#) section apply to clinical experience. Please be familiar with them.

Clinical Guidelines

Placements

The program will assign students to clinical placements according to their [Clinical Pathway](#), while considering their educational needs and the availability of experiences. Pathways may change due to the availability of clinical placement space. All students will complete clinical rotations outside of a major center in Saskatchewan throughout all years of the program. Rural clinical experiences are an expectation of all students. During clinical rotations, shifts may occur on weekends and may vary between 6-12 hours. Students need to expect that 12-hour shifts are a regular part of clinical practice.

Preparation

Students are expected to be prepared for their clinical experiences. Often this preparation will include chart research or other activities prior to direct client care and each set of shifts. For all activities in the clinical setting, including chart research, students are expected to wear their nursing student uniform or appropriate street clothes and their clinical ID badge. Some areas may require lab coats. In addition, students should identify themselves and their purpose to staff in the area. When doing chart research, students should not take charts out of the charting area.

Attendance

Clinical experience is an integral part of the program. It is expected that students will participate in all clinical experiences in their courses. It is recognized that absences may be unavoidable (e.g., illness); there are policies in place which address missed clinical experience time. Students who have been absent from clinical due to health problems may be required to produce a medical certificate stating they may return to clinical. Avoidable or repeated absences are not acceptable and could impact completion of the course. Students should be aware that employers often ask about attendance when seeking references.

In cooperation with agency staff, students' client assignments will generally be selected prior to the clinical experience. If illness or other unavoidable circumstances prevent the student from being present for their clinical experience, it is important for them to let people know as soon as they can **before** they are scheduled to begin their clinical experience. The student should notify **both** the instructor and the clinical practice area of their absence.

Professional Conduct

By arriving to the clinical or lab setting and proceeding to provide patient care, students are acknowledging that they can demonstrate fitness to practice - ELC 2.10 ([CRNS](#), 2019, p.8). Fitness to practice includes "all the qualities and capabilities of an individual relevant to their practice as a nurse, including but not limited to the freedom from any cognitive, physical, psychological or emotional condition and dependence from alcohol or drugs that impairs their ability to practice nursing" (CNA, 2017b, p.22). If students do not have the necessary physical, mental or emotional capacity to practice safely and competently, they must withdraw from the provision of care after consulting with their instructor or preceptor.

It is the student's responsibility to report to both their instructor and the appropriate staff before beginning each of their shifts. It is an expectation that they collaborate and communicate with both the instructor and appropriate staff during their clinical experience.

If the student is in an institutional setting, they must report to the appropriate RN/RPN regarding their assigned clients before they leave the clinical area for any reason (e.g., coffee, end of experience, going out of the area with a client). In community settings, the instructor (if on site) or appropriate staff must be advised of the student's whereabouts.

Students may **NOT** act as a witness for legal documents such as wills, surgical consents, or release of hospital responsibility.

Medication Exam Safety

Safe medication administration is an essential component of providing safe care. The College of Nursing has a [Medication Exam Process](#) for Clinical Courses to support safe medication administration by students.

Students must pass a course specific standardized medication calculation and knowledge exam in each clinical course where they are expected to administer medications.

Agency Manuals and Policies

Most agencies have manuals dealing with policies, procedures, and charting specific to that particular agency. Students should familiarize themselves with the manuals in the area of their clinical experience and follow policies and procedures of the agency in which they are having the experience. If in doubt, the student must refer to their instructor.

Charting

Throughout their program student's will become familiar with the principles of documentation. During their clinical experience, they must follow charting policies of that specific agency, which includes use of agency specific abbreviations. When charting, students are to use the letters **USask NS (Nursing Student)** after their name when it is necessary to identify their designation.
Example: John Smith, USask NS

Performance of Technical Skills

Clinical experience provides an opportunity for students to develop their nursing skills and knowledge. While students are encouraged to seek learning experiences, they must not perform **any** procedure for which they do not have adequate preparation.

Year 3 & 4 students **may** perform certain RN Specialty Practices under **direct and continuous** supervision of an instructor or RN/RPN who is certified for the procedure **if** the student has been provided with theoretical background.

Clinical ID Badges

Students are required to wear an approved clinical ID badge in labs and clinical areas throughout the duration of their program. The College of Nursing orders one clinical ID badge per student. If the student misplaces their ID badge, they must contact the [Card Office](#) to order a new one. The student is responsible for the cost of the replacement. The clinical ID badge is the property of the College of Nursing and thus must be returned to the College of Nursing if requested.

Uniforms

Uniforms will be required for all lab and clinical experiences unless otherwise specified. Students are to refer to their acceptance letter and our website for information about [Uniform Purchase](#).

Additional Forms and/or Training

Some agencies may require students to complete additional forms or training. Students will be notified when supplemental paperwork or training sessions are required. Students are expected to complete the required paperwork or training prior to the given deadlines to ensure their placement goes forward. Failure to complete these items may impact the student's ability to participate in their clinical experience.
