About this Handbook

This handbook is intended to answer many of the day-to-day questions in the College of Nursing. It will be of great practical benefit during your time as an undergraduate student. It contains invaluable information about examinations and what is required from you to progress towards graduation. It will act as a pointer towards useful resources should you encounter any problems. The student handbook also includes regulations and policies that apply to College of Nursing students. This handbook is updated annually, so please take time to study it again.
Message from the Dean

Welcome to the College of Nursing!

I am pleased to welcome you to the College of Nursing at the University of Saskatchewan. The year 2020, has been designated as the *International Year of the Nurse and Midwife*, by the World Health Organization, in honor of Florence Nightingale’s 200th anniversary of her birth. The College of Nursing has a long and proud history, one that welcomed its first class of nursing students in 1938! You have chosen an exciting, albeit challenging time to embark on your nursing education. The COVID-19 pandemic has transformed our world, and heightened the tremendous importance of the nursing profession. I have been a registered nurse for 39 years, never in my lifetime has the role of the nurse been more widely celebrated.

At this point in history, as a College we are positioned as leaders in nursing education and research -- locally, provincially, nationally, and globally. The College’s *Learn Where You Live* educational model provides accessible quality programming to prepare nursing students for the evolving needs and changes of our health care system at our six locations throughout the province. Our commitment to rural and remote community engagement and our strong relationships with Indigenous communities impact our approaches to nursing education curriculum and student experiences. We are proud to have the largest number of declared Indigenous nursing students in any nursing program in the country.

During your time with us, you will be introduced to our outstanding nursing faculty who will guide and support you during your nursing education, expose you to their research and clinical practice, and challenge you to think critically as you provide compassionate evidence informed nursing care. We are very fortunate to have strong clinical partners in a variety of diverse community and institutional clinical practice settings. As a practice profession, we collaborate with our clinical partners who are committed to providing high quality care, in order to provide you with rich clinical learning experiences. Throughout your studies, you will learn a lot about nursing (and a lot about yourself); your lives will be forever impacted by the experiences you will have working with patients, families, and communities.

On behalf of the faculty and staff of the College of Nursing, I wish you well as you embark on your nursing education with us. I look forward to hearing your trials and tribulations, as you engage in your journey to becoming a member of the nursing profession. I am excited to walk beside you during this exciting journey.

Sincerely,

Cindy Peternelj-Taylor
Professor and Interim Dean
Introduction

Philosophy Statement
Nursing is a respected and caring human endeavor; a distinct health profession; and an applied discipline based on nursing and related theories. Nursing is dedicated to the purposeful, collaborative relationship with individuals, families and communities that enables the acquisition, organization and use of nursing and other related resources that people need to optimize their health experiences within complex, diverse, and dynamic environments.

Embedded in a research-intensive Canadian university, the College of Nursing is situated on the territory of Treaties 4, 6, 10, and the homeland of the Métis. The College of Nursing, University of Saskatchewan, believes the discovery, advancement, and transmission of nursing knowledge is achieved through the integration of teaching, research/scholarship, evidence informed practice and service. Learning is the process of co-creating meaning that transforms experiences into shared knowledge. We value diversity, social justice and ethical practice. We foster collaboration through primary healthcare, practical innovations and technology mediated solutions, with specific consideration of the needs of rural, remote, and Indigenous communities.

The College of Nursing and our graduates are leaders in engaging individuals, families, communities, policy makers, other health professions and disciplines, and other stakeholders to provide safe, competent care that maximizes the potential of people and health systems. Through these combined efforts, we create, support, and share equitable and sustainable solutions that improve health experiences and measurable outcomes. Solutions have local, national, and international relevance.

Our Vision
The College of Nursing is a world leader in educating nurses in interprofessional health care, research, practice, innovation, capacity building and policy development.

Our Mission
As University nursing faculty in Saskatchewan, the College of Nursing strengthens nursing, health, and the health care system through the creation and integration of knowledge from research, education and practice.

We Value
Integrity - We believe in being open and honest, in keeping our commitments, in taking responsibility for our lives and learning, and in operating in a transparent manner.

Social Justice - We believe in the value of human life, the inherent worth of the individual, the right of each individual to the attainment of a high standard of health and will work with communities to achieve these rights.

Unconditional Positive Regard - We believe that each person has a right to be treated with respect regardless of his or her life circumstances or culture.

Achieving Potential - We believe that life-long learning, risk taking and advancing our knowledge base leads the way for empowerment.
Important Dates – BSN Program

Please Note: Dates are subject to change and additions may be made

This Calendar highlights College of Nursing changes due to COVID-19 and should be used to supplement the University 2020-2021 Academic calendar. This fall, all year 3 and 4 classes are open learning and do not follow the University dates for withdrawal and tuition credit. Please contact an advisor at nursing.advising@usask.ca if you have questions.

Before withdrawing from a course, students are encouraged to discuss this action with their Academic Advisor.
Program Information

The University of Saskatchewan, College of Nursing, believes that baccalaureate education is required for nurses to provide safe competent care. Through the acquisition of theoretical, practical, and ethical knowledge, baccalaureate education contributes to developing knowledgeable and active practitioners committed to enhancing and transforming nursing practice for individual, family, community and population health. The hallmark of baccalaureate education is to support the application of knowledge as action in practice (Purkis & Bjornsdottir, 2006). In this section we present the intents of the Program, the conceptual framework that is the foundation for the curriculum, and an overview of the courses required to complete the degree and meet the beginning competencies as a graduate nurse.

Program Intents

Graduates will meet the entry-level competencies of the professional regulatory body, the Saskatchewan Registered Nurses Association (SRNA) and the Canadian Association of Schools of Nursing (CASN). Graduates will be eligible to write the National Council Licensure Examination (NCLEX).

Graduates of our program contribute to the scholarship of the nursing profession. The Canadian Association of Schools of Nursing (CASN) defines scholarship as "a full range of intellectual and creative activities that may include the generation, validation, synthesis and/or application of knowledge to advance the teaching, research, and practice of nursing" (CASN, 2001). Unique to a practice discipline, such as nursing, CASN expects educational programs address the scholarship of service thus requiring graduates to use their specialized knowledge and experience outside the work setting to shape and advance the profession and its values, and contribute to social efforts that benefit humans and society (CASN).

Upon completion of their degree, graduates with a Bachelor of Science in Nursing (BSN) are expected to function as generalists in a variety of practice settings, in partnership with individuals, families, groups and communities. They will provide safe, competent quality care in accordance with the standards of professional practice. Consistent with CASN's expectations for scholarship in a practice discipline, graduates will demonstrate a strong sense of confidence, passion and an attitude of curiosity for the profession and the practice of nursing. Graduates will enter a knowledge intensive environment of health care and service delivery. Our program will position them to work collaboratively within an interprofessional team and to contribute to health maintenance by their ability to use critical thinking, reflection, analysis and synthesis for evidence-informed practice. Graduates will be accountable for professional behaviour as guided by the Canadian Nurses Association's Code of Ethics and SRNA provincial regulatory competencies and standards. At the time of graduation, students will be able to articulate a clear sense of the professional nursing role and scope of practice.

The College of Nursing values integrity, social justice, unconditional positive regard and achieving potential. These values are inherent in our teaching and programs of research. Learning occurs within an environment where faculty demonstrate our beliefs of "being open and honest, in keeping our commitments, in taking responsibility for our lives and learning, and in operating in a transparent manner." Students are taught the "value of human life, the inherent worth of the individual, the right of each individual to the attainment of a high standard of health and will work with communities to achieve these rights and that each person has a right to be treated with respect regardless of his or her life circumstances or culture." The BSN is the beginning stage in achieving potential. Our faculty members share with CASN the understanding of scholarship of application as a means to maintain competencies throughout one's career. Graduates understand nursing as a profession requires "life-long learning, risk taking, and advancing one's knowledge base leads the way for empowerment" (College of Nursing, 2008).

Graduates are taught that leadership is a fundamental competency for nursing practice. Exhibiting qualities of leadership in the delivery of care, in both formal and informal roles, and an ability to be comfortable with uncertainty and change are expected competencies.
The BSN nursing curriculum is designed for students to progress from basic understanding of nursing approaches to the ability to show adaptation and innovation from simple to complex skills. Nursing practice in every term will solidify learning and increase confidence in the students. The intent is to seek at least one interprofessional experience per term. Curricular chairs in the health sciences colleges are always reviewing options for these opportunities. Currently there are a number of teaching projects that students are a part of. These will continue to be offered and additional options will be developed.

Experts in disciplines for courses that are part of the nursing curriculum will teach those courses (i.e., microbiology, pharmacology, and anatomy and physiology). Application of the knowledge from the support disciplines to nursing practice will be integrated in the nursing courses in the same terms these courses are taught. For instance, assessment skills are taught in the same terms as anatomy and physiology, so learning is relevant and will be more likely to be retained. To demonstrate more relevance, the assessment skills are taught in conjunction with nursing interventions appropriate to those assessment skills.

Program Outcomes

Graduates will...

1. be prepared as generalists to function in a variety of practice settings, with diverse populations across the lifespan, in regional, national, and global contexts

2. demonstrate caring and culturally safe and sensitive behaviors that create an environment of respect for the dignity of patients, families, and health professionals

3. be prepared to provide compassionate, culturally safe and sensitive, relationship-centered care for diverse populations including: First Nations, Inuit, and Métis patients, their families or communities

4. integrate critical thinking, nursing knowledge, and professional values into ethical clinical decision-making and the provision of patient care

5. articulate a clear sense of the professional nursing role in an interprofessional team, accountability in practice, and scope of nursing practice

6. investigate health-related social justice and advocacy concerns within legal, ethical and political context

7. appraise and select current theory and evidenced-based knowledge to collaborate effectively within an interprofessional team to deliver safe, patient-centered care

8. appraise and select current theory and evidenced-based knowledge to communicate with, guide, and teach individuals, families and populations regarding health promotion and illness prevention

9. be prepared to access and utilize patient care technologies, information systems, and communication devices to achieve quality patient outcomes

10. apply leadership knowledge and ethical decision making to take on formal and informal leadership roles within healthcare systems

The College of Nursing BSN/PDBSN program is approved by the SRNA (Saskatchewan Registered Nurses Association) and accredited by CASN (Canadian Association Schools of Nursing). All courses are mapped to the competencies of the SRNA and the standards of CASN.
The conceptual model for the curriculum is based on the goals of the College of Nursing, the understanding of nursing as a discipline and a profession, and the understanding of educational theory. The model is learner centred with recognition of nursing practice areas and environments, and acknowledges the principles that will drive the curriculum. It sets the stage for our teaching process and is broad enough to encourage many perspectives that will evolve during the life of the curriculum.
The conceptual model for the curriculum is congruent with the concepts of the medicine wheel, a well-known model of health among Aboriginal peoples. The province has a significant number of Aboriginal people and the proportion of this population is increasing. According to the 2011 census, there are more than 157,740 Aboriginal people in Saskatchewan (15.6% of the population) and this number is expected to more than double by 2050, when it is predicted that one-third of the province will be Aboriginal. The number of Aboriginal students in the current nursing program is the largest in the country. It is appropriate that the University of Saskatchewan College of Nursing curriculum harmonizes with Aboriginal perspectives of health.

The medicine wheel represents the sacred circle of life and is organized around the four directions (east, south, west and north) and the four layers of life, (self, family, community and nation) all of which can be seen within the curriculum framework. The inner circle represents the individual (learner) in the medicine wheel. In the second circle, the types of learning expected are placed in the directions corresponding with the four directions depicting the holistic perspective of nursing care. An explanation of why the medicine wheel is appropriate in the model of student-centred learning is that the student who is placed at the centre of the learning circle will acquire and demonstrate the following components in learning: skills (EAST/Physical dimension) will be practiced with respect, kindness and vision; attitude (SOUTH/Emotional dimension) will be shown by honesty, in relationships developed and in time association; judgement (WEST/Mental dimension) will be demonstrated with responsibility, nurturing and reality acceptance; and knowledge (NORTH/Spiritual dimension) will be shown in efforts to seek and value intuition, wisdom and experience. The third circle represents the context of nursing practice, including the aspect of "community" in the medicine wheel. The outer circle is the societal environment in which nursing practice occurs, including, the aspect of "nation" in the medicine wheel. The medicine wheel is a framework by which individuals, families, communities and nations can assess their level of health and wellbeing, to find a place of balance. Ideally, students will graduate from the program as balanced, healthy nurses. As recognition of the history of Aboriginal peoples in our province and of their continuing role, it is our intent to include Aboriginal context in each nursing course in the curriculum and to prepare nurses to interact and offer respectful care.

Carper (1978) described four patterns of knowing for nursing: empiric, ethics, personal and aesthetic. All are useful in planning nursing education. Knowledge is acquired in unique ways and world views are acknowledged as influential in that acquisition. Diverse ways of being are accepted and recognized. The curriculum model fits with other world views as various cultural perspectives are incorporated into teaching modalities to respect the demographic diversity of Saskatchewan's residents as well as those in Canada. The College of Nursing's Integrated Plan's goal to support 'excellence in scholarship' in objective 5.10 states that "we will have a rational, consistent framework for global issues in the curricula..." The curriculum model fits with that objective as well.

- NURS 332.3 - Exploring Complexity and Acuity*
- NURS 333.3 - Complex Nursing Care Practice*

* NURS 332/333 must be completed in Term 1 or Term 2 at all sites

#### Year Four

- NURS 422.3 - Issues in Leadership and Management: Transformative Practice in Health Care Organizations
- NURS 430.3 - Community Health Nursing: Building Partnerships
- NURS 431.6 - Community Nursing Practice
- NURS 440.3 - Interprofessional Perspectives: Health Systems and Policy Development within a Global Context
- NURS 441.3 - Transitioning to Professional Practice
- NURS 450.9 - Practice Integration

Restricted NURS Elective.3
Restricted Electives in the BSN Program and PD BSN Option

The following classes have been approved to be included as restricted electives in the BSN program and PDBSN option.

<p>| University of Saskatchewan |
|-----------------------------|-----------------|
| <strong>Course</strong>                  | <strong>Title</strong>                        |
| AGMD.3                      | Public Health &amp; the Agricultural Rural Ecosystem |
| ANTH 398.3                  | Anthro of Mental Illness (no longer offered) |
| ARCH 472.3                  | Paleopathology                       |
| CHEP 403.3                  | Global Health II                     |
| COMM 384.3                  | Workplace Health and Safety           |
| EFDT 301.3                  | Educator Identity in Context: Anti-Oppressive &amp; Ethical Beginnings |
| EFDT 435.3                  | Critical Perspectives of Educational Thought and Values |
| EFDT 335.3                  | Introduction to First Nations and Cross Cultural Education |
| ENVS 401.3                  | Sustainability in Action             |
| EPSE 302.3                  | Contexts of Learning and Development |
| INDG 230.3                  | Traditional &amp; Contemporary Gender    |
| INDG 264.3                  | Aboriginal People and Canadian Politics |
| INDG 265.3                  | Aboriginal People and Development    |
| KIN 223.3                   | Contemporary Health Issues           |

Integrity is expected of all students in their academic work–class participation, examinations, assignments, research, practica – and in their non-academic interactions and activities as well.

What academic integrity means for students
Perform your own work unless specifically instructed otherwise. Check with your instructor about whether collaboration or assistance from others is permitted.
Use your own work to complete assignments and exams.
Cite the source when quoting or paraphrasing someone else’s work. Discuss with your professor if you have any questions about whether sources require citation.

Follow examination rules.
Discuss with your professor if you are using the same material for assignments in two different courses.
Be truthful on all university forms.
Use the same standard of honesty with fellow students, lab instructors, teaching assistants, sessional instructors and administrative staff as you do with faculty.

Integrity in non-academic activities
Misconduct that disrupts the activities of the university or harms the legitimate interests of the university community could be the cause for non-academic disciplinary action.

GUIDING PRINCIPLES

The university documents that lay out our rules and procedures are the Student Academic Misconduct Regulations (University Council) and the Standard of Student Conduct in Non-Academic Matters (University Senate). Both documents are based on the same Guiding Principles from the Policy on Student Discipline.

• Freedom of Expression
• Commitment to Non-violence
• Mutual Respect and Diversity
• Commitment to Justice and Fairness
• Security and Safety
• Integrity

ACADEMIC MISCONDUCT PROCEDURES

“Academic Misconduct” is the term the University uses to describe cheating. Types of cheating are listed in the Student Academic Misconduct Regulations of University Council. There is an onus on every student to become informed about academic misconduct. When an instructor believes a student is guilty of academic misconduct, the following procedures are used:

Informal procedure:
Sometimes misconduct is the result of carelessness, misunderstanding of the rules, or miscommunication. In such cases, the instructor may discuss the matter with the student informally. If the student concedes the misconduct, the instructor has the authority to impose one or more of the following penalties:
- reduce the grade on the assignment or exam, to as low as zero
- require the student to rewrite the assignment or exam
A penalty imposed by an instructor is not reported to the student’s college and does not become part of the student’s record. A student who disagrees with the allegation of cheating or with the penalty imposed may request a formal hearing.

Formal procedure:
For more serious misconduct, or in cases where the student disputes the allegation or the penalty, a college hearing board will hear the matter. Procedures for hearings are described in the Regulations. The hearing board has the authority to impose one or more of the following penalties:
- reprimand or censure the student
- reduce the grade on the assignment, exam, or entire course, to as low as zero
- require the student to rewrite the assignment or exam
- require the student to submit an essay or a presentation on academic misconduct
- suspend or expel the student
- postpone, deny or revoke the student degree, diploma or certificate
A penalty imposed by a Hearing Board is reported to the student’s college and to the university, and becomes part of the student’s record. A finding of misconduct in research funded by an external agency is reported to that agency. Further appeal of a hearing board decision or penalty is permitted only on grounds of unfair procedure or new evidence.

FOR MORE INFORMATION
Student Conduct and Appeals website: www.usask.ca/university_secretary/honesty
Date: Effective May 9, 2012
The following constitute academic misconduct that may be the subject-matter of an allegation under the **Student Academic Misconduct Regulations:**

(a) Providing false or misleading information or documentation to gain admission to the university or any university program;

(b) Theft of lecture notes, research work, computer files, or other academic or research materials prepared by another student or an instructor or staff member;

(c) Using work done in one course in fulfillment of any requirement of another course unless approval is obtained from the instructor by whom the material is being evaluated;

(d) Presenting the work of someone else as one’s own;

(e) The supply of materials prepared by the student to another student for use by that student as the work or materials of that student;

(f) Alteration or falsification of records, computer files, or any document relating to a student’s academic performance;

(g) Violation of the university’s policy on misconduct in scholarly work as outlined at www.usask.ca/university_secretary/policies/research/8_25.php

(h) Fabrication or invention of sources;

(i) Failure to observe any stated rule with regard to the procedure used in an examination (or an activity undertaken for academic credit) where such a failure could result in the student gaining relatively greater credit;

(j) Altering answers on a returned examination;

(k) When prohibited, removing an examination from the examination room;

(l) Seeking to acquire or acquiring prior knowledge of the contents of any examination question or paper with the intention of gaining an unfair advantage;

(m) Possessing or using notes or other sources of information or devices not permitted by the course instructor in an examination;

(n) Consulting or seeking the assistance of others when writing a “take home” examination unless permitted by the course instructor;

(o) Providing false or misleading information with the intent to avoid or delay writing an examination or fulfilling any other academic requirement;

(p) Failing to observe the terms of any agreement not to disclose the contents of an examination;

(q) Misrepresenting or conspiring with another person to misrepresent the identity of a student writing an examination or engaging in any other form of assessment;

(r) Knowingly doing anything designed to interfere with the opportunities of another person to have his or her contribution fully recognized or to participate in the academic program;

(s) Preventing others from fair and equal access to University facilities or resources, including library resources;

(t) Using or attempting to use personal relationships, bribes, threats or other illegal conduct to gain unearned grades or academic advantages;

(u) Knowingly assisting another person engaged in actions that amount to academic misconduct;

(v) **Plagiarism:** the presentation of the work or idea of another in such a way as to give others the impression that it is the work or idea of the presenter. Adequate attribution is required. What is essential is that another person have no doubt which words or research results are the student’s and which are drawn from other sources. Full explicit acknowledgement of the source of the material is required. Examples of plagiarism are:

(i) The use of material received or purchased from another person or prepared by any person other than the individual claiming to be the author. [It is not plagiarism to use work developed in the context of a group exercise (and described as such in the text) if the mode and extent of the use does not deviate from that which is specifically authorized].

(ii) The verbatim use of oral or written material without adequate attribution.

(iii) The paraphrasing of oral or written material of other persons without adequate attribution.

(w) Unprofessional conduct or behaviours that occur in academic or clinical settings or other work placements, or that are related to the student’s area of professional practice.
Scholarly Writing

The following list of resources is provided to assist you in writing scholarly papers and citing scholarly references.

Books on Writing from USask Library:

Grading

A percentage grading system is used in the Bachelor of Science Nursing program. Academic or clinical performance meriting a particular grade is described by a term called a literal descriptor. The relationship between the literal descriptors and percentage grades is shown below. You will note that in each classification the last four statements are particular to the program. They are specifically, although not exclusively, designed for use in clinical and lab situations.

**Literal Descriptors for Determination of Grades**

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Literal Descriptor</th>

</table>
| 90-100     | Exceptional        | A superior performance with consistent strong evidence of  
  • A comprehensive, incisive grasp of the subject matter;  
  • An ability to make insightful critical evaluation of the material given;  
  • An exceptional capacity for original, creative and/or logical thinking;  
  • An excellent ability to organize, to analyze, to synthesize, to integrate ideas, and to express thoughts fluently.  
  ♦ Consistent superior praxis (applying, adapting and generating knowledge in practice);  
  ♦ Consistent accountability;  
  ♦ Consistent insightful and effective interpersonal relationships;  
  ♦ Consistent and appropriate self-direction. |
| 80-90      | Excellent          | An excellent performance with strong evidence of  
  • A comprehensive grasp of the subject matter;  
  • An ability to make sound critical evaluation of the material given;  
  • A very good capacity for original, creative, and/or logical thinking;  
  • An excellent ability to organize, to analyze, to synthesize, to integrate ideas, and to express thought fluently.  
  ♦ Superior praxis (applying, adapting and generating knowledge in practice);  
  ♦ Consistent accountability;  
  ♦ Consistent effective interpersonal relationships;  
  ♦ Consistent and appropriate self-direction. |
| 70-79      | Good               | A good performance with evidence of  
  • A substantial knowledge of the subject matter;  
  • A good understanding of the relevant issues and a good familiarity with the relevant literature and techniques;  
  • Some capacity for original, creative and/or logical thinking;  
  • A good ability to organize, to analyze, and to examine the subject material in a critical and constructive manner.  
  ♦ Sound praxis (applying, adapting and generating knowledge in practice);  
  ♦ Consistent accountability;  
  ♦ Consistent effective interpersonal relationships;  
  ♦ Decision making which required minimal support. |

- Denotes additional College of Nursing descriptors
Academic Regulations
Academic regulations at the University of Saskatchewan apply to all students and courses in the Bachelor of Science in Nursing (BSN) program. For general University of Saskatchewan regulations, refer to the University of Saskatchewan course catalogue.

Procedures for Student Appeals in Academic Matters
If a student is dissatisfied with their grade, click here for information on how to question/appeal a grade.

Regulations on Student Academic Misconduct
Academic misconduct is what the University calls cheating, click here for more information.

Standard of Student Conduct in Non-Academic Matters and Regulations and Procedures for Resolution of Complaints and Appeals
The purpose of these regulations and procedures is not to actively monitor or control student behaviour, but rather to provide a mechanism for responding to complaints about student behaviour that violates the standard of conduct expected of students in non-academic matters.

Additional Student Fees
- NURS 200: A materials fee is attached to this course to cover the license for HESI learning resources that are used throughout the BSN program.
- NURS 202, 220, 305, 311, 312: A lab fee is attached to these courses to cover a portion of consumable supplies used by students in the nursing procedures lab.
- NURS 441: A materials fee is attached to this course to cover the license of HESI Exit Exams for NCLEX-RN preparation.

Student Support Services
Student Cards and Numbers
You will have an identification number for USask. It is your responsibility to ensure that you use the correct identification number on exams.

**NOTE:** Student identification numbers are required for all examinations.

Access and Equity Services (AES)
Students who have disabilities (learning, medical, physical, or mental health) are strongly encouraged to register with Access and Equity Services (AES) if they have not already done so. Students who suspect they may have disabilities should contact AES for advice and referrals. In order to access AES programs and supports, students must follow AES policy and procedures. For more information, check www.students.usask.ca/aes, or contact AES at 306-966-7273 or aes@usask.ca.

Examinations with AES
Students registered with AES may request alternative arrangements for mid-term and final examinations. Students must arrange such accommodations through AES by the stated deadlines. Instructors shall provide the examinations for students who are being accommodated by the deadlines established by AES.

If you have a disability and require accommodations:
Please obtain appropriate documentation to register with AES so you can access services and programs. There are also deadlines that must be met to request exam accommodations.
- For medical-based disabilities, a health care practitioner licensed to diagnose must fill out a AES Medical Questionnaire.
- For learning disabilities, submit a psychoeducational assessment completed within the last five years by a registered and fully licensed psychologist.

If you require accommodation based on your religion, family status (including pregnancy) or gender identity, please contact aes@usask.ca or phone 306-966-7273.

If you have questions regarding whether your documentation is appropriate or if you have questions regarding accommodations within other protected areas please contact us.

Discrimination and Harassment Prevention
The University of Saskatchewan has policies regarding harassment. For specific information, see The University's Policy on Discrimination and Harassment.
Scholarships, Awards, and Bursaries
A number of scholarships, awards, and bursaries are available to students. Information is available on the College of Nursing website at Scholarships, Bursaries & Awards

Academic Advising
Current nursing students should consult an academic advisor if they have questions about their program of study or to discuss any issues that may possibly impact academic success. Academic advisors assist students to interpret college policies, procedures and requirements, and support nursing students to make practical academic plans and decisions, including providing help with developing strategies to improve academic performance. Academic Advising is a partnership between the advisor and the student where both parties provide information and direction within the student’s educational progression. Academic advisors help students to understand their options and access available resources and services. There are advisors in Regina, Prince Albert and Saskatoon. The students at distributed sites have access to an advisor dedicated to their sites. Northern students should access the Prince Albert advisor and Yorkton students should access the Regina advisor.

https://nursing.usask.ca/advising/overview.php
To book an appointment with an advisor at your campus:
https://nursing.usask.ca/advising/appointments.php or email: nursing.advising@usask.ca.

University of Saskatchewan Community of Aboriginal Nursing (UCAN)
UCAN recruits and supports Aboriginal students interested in or enrolled in the University of Saskatchewan undergraduate and graduate nursing programs. Aboriginal nursing advisors in Saskatoon, Regina and Prince Albert work with students to build community through gatherings and peer networks, provide academic and personal advisement and facilitate tutoring, mentorship and referrals to culturally appropriate supports as requested. UCAN advisors are also available to provide information and referrals for child care, housing, funding and other concerns. UCAN promotes an “open door” philosophy and welcomes international students and non-Aboriginal students to connect as well. Please feel free to stop by and see us! To learn more about University of Saskatchewan Community of Aboriginal Nursing

Library Services
The University Library plays an important role in supporting students’ research and academic careers. You can contact Kevin Read, your nursing liaison librarian for help with finding and using library resources, developing research questions, and creating search strategies for assignments or research projects. You can reach Kevin by email at kevin.read@usask.ca

Students are strongly encouraged to make an appointment with Kevin to take advantage of this service.

The library’s Nursing Research Guide and Library Information for Nursing on the College of Nursing website provide a wealth of information students can use for finding information for their work. These guides include links to all of the library’s nursing-specific resources, including journals, ebooks, mobile apps, and more. If the library does not have something you need, it can always obtain it from another library for free.

You can also contact the Health Sciences Library by phone at 306-966-5991, or by contacting Ask Us at Health Sciences Library

Program Completion

*NOTE: Withdrawal from a course will jeopardize your completion of the program. In addition, withdrawal from a course may mean you do not have the necessary pre/co-requisites to continue in other courses in which you are registered (that is, you may be required to drop other courses as well). If you are considering withdrawing, you must meet with a College of Nursing Academic Advisor to discuss your situation.

Students who fail or withdraw from a clinical course will be required to meet with the Academic Advisor at their campus. Prior to receiving permission to repeat the clinical course, the Associate/Assistant Dean will determine what course work will be required to prepare for the clinical course. Please refer to the policy Repeating a Course in the policy section of the website.

While we hope you will complete the program, some students, for a variety of reasons, choose not to do so.

If you are considering withdrawing from the program, please contact a College of Nursing Academic Advisor. Withdrawal from the program will require that you reapply, following the application process again should you decide to return. You should be aware that readmission to the program is on a “space available” basis.

Standards and Foundation Competencies

The College of Nursing’s BSN program and PDBSN option are approved by the Saskatchewan Registered Nurses Association (SRNA) and the SRNA’s standards and foundation competencies are woven throughout the curriculum. For students to be successful in their program they must have the necessary requisite skills and abilities (RSAs) to meet these competencies and be able to enter the profession as a generalist.

Promotion and Graduation

*NOTE: In order to be awarded your degree from the University of Saskatchewan, you must complete an Application to Graduate Form, whether or not you plan to attend the convocation ceremony in Saskatoon. Further graduation information is available on the Convocation website.

Withdrawal Deadline from Clinical Classes
**Regulations**

**Communication**
All communications (electronic or otherwise) should be clear, courteous, accurate, appropriate, and timely. Students are expected to keep their personal contact details up to date, and to know where to look for, and how to find, information relevant to them (including print material, course websites, college webpages, USask email, and other means as defined during their program).

Important information from the college administration office and from faculty instructors will be sent to students frequently throughout their time as students in the college. All such communication will be sent to students using their University of Saskatchewan email accounts at mail.usask.ca. **It is the responsibility of students in the College of Nursing to check their USask email account on a regular basis while enrolled in programs at the college.** If students choose to set up mail forwarding on their email account, they are responsible for ensuring that mail forwarding is set up correctly and that they are able to receive emails sent to their USask email account.

For more information about student email accounts, please contact the [ICT Services & Support Website](mailto:).  

**Deferred Final Examinations**
Deferred final examinations may be granted in extenuating circumstances. Refer to the [University of Saskatchewan website](https://www.usask.ca/). **For more information please refer to the **[InfoLaw Social Media](https://infolaw.usask.ca/social-media).**

**Deficient Courses on Admission**
BSN students can be admitted with one deficiency in one of the following pre-professional courses: Social Sciences, Statistics, Nutrition, or Indigenous Studies. A grade of 50% in the deficient course will be used in the calculation of the admission average for the BSN. PDBSN students can be admitted with one deficiency in the following prerequisite courses: Social Sciences, Nutrition, or Indigenous Studies. The deficiency must be cleared by December 31 of the year you are admitted. If unofficial proof of completion is not submitted by December 31 you will not be able to continue in your nursing studies and may have to reapply for admission. Official transcripts must be sent to your academic advisor at the College of Nursing by January 31.

**Site Transfer**
There are no transfers between sites (for current or returning students).

**Smoking, Alcohol, and Substance Policy**
The University policy is intended to provide a framework to establish rules, understanding and expectations regarding the use of Smoking (and the use of all Electronic Smoking Products), Alcohol, Cannabis and other Lawful Substances. [https://policies.usask.ca/policies/health-safety-and-environment/Alcohol-Smoking-Substance.php#AuthorizationandApproval](https://policies.usask.ca/policies/health-safety-and-environment/Alcohol-Smoking-Substance.php#AuthorizationandApproval)

**NOTE:** The passing grade for students taking courses from institutions other than the USask is the passing grade of the institution offering the course.
Social Networking
The University of Saskatchewan Guidelines for Faculty and Students using Internet Social Networking in the Academic Context were developed by a Subcommittee of the Academic Support Committee of Council.

Students are reminded that there are privacy requirements, including maintaining patient/client/clinical practice confidentiality, that must be adhered to when using social network applications and web sites (e.g., blogs, Facebook, Myspace, YouTube, Twitter, etc.) in association with a course. Please note that postings must be professional, respectful, and appropriate. Please also note that policies regarding academic integrity and provincial/federal laws may be breached if social networking is used inappropriately, whether used for a course or personal communication, resulting in serious consequences.

Please also note that inappropriate use of social networking applications and websites reflects not only on the individual but also on the program and institutions offering the program. Although there is a perception of anonymity and privacy, once a message is posted it no longer is private. For more information please refer to the Office of the Privacy Commissioner of Canada.

Transfer Credit
1. The Bachelor of Science in Nursing program and the curriculum is approved by the Saskatchewan Registered Nurses’ Association (SRNA) and accredited by the Canadian Association of Schools of Nursing (CASN). As such, students enrolled in the College of Nursing undergraduate programs are expected to take the approved classes from the College of Nursing. Classes that are exceptions to this include: Anatomy and Physiology (NURS 207.3 and NURS 208.3), Microbiology (MCIM 223.3), Research Methods (NURS 205.3) and the Restricted Nursing Elective.3.

2. Classes taken prior to admission into the College of Nursing undergraduate program will be considered for transfer credit, if less than 6 years old from time of admission.

3. A grade will be assigned for credit only if the course was taken from the University of Saskatchewan. When two or more courses are used to meet the requirement of one course, a weighted average will be calculated.

4. An equivalent course from USask will be considered for credit into the undergraduate nursing program as a nursing course only if the grade achieved in that course was 60% or greater.

5. All courses taken from other institutions and granted transfer credit will not have a grade assigned for use in calculating averages.

6. An equivalent course from another institution will be considered for transfer credit into the undergraduate nursing program only if the student received credit for the course at the other institution, and the grade achieved was 60% or greater.

7. There is no course equivalency for transfer credit in the undergraduate nursing program for NURS 450.9: Practice Integration.

Additional Forms and/or Training
Some placements may require additional forms or training completed by students. Students will be notified when supplemental paperwork or training sessions are required and are expected to complete this prior to given deadlines to ensure their placement goes forward. Failure to complete these items may impact the student’s ability to participate in their clinical experience.
Clinical Experience Guidelines

Clinical and lab experiences are an integral part of the program. The University of Saskatchewan has contracts with the major agencies in which you will have experience. All of your clinical experiences, regardless of where they are, will be arranged by the program. During your experiences, you will be supervised by either a College of Nursing instructor or agency staff.

NOTE: Many of the policies in the previous policy section apply to clinical experience. Please be familiar with them.

Placements

The program will assign you to clinical placements according to your Clinical Pathway, considering your educational needs and the availability of experiences. Pathways may change due to the availability of clinical placement space. All students will complete clinical rotations outside of a major center in Saskatchewan. During clinical rotations, shifts may occur on weekends and may vary between 8-12 hours. Students need to expect that 12 hour shifts are a regular part of clinical practice. In order to facilitate learning experiences, lab/clinical experiences may be scheduled at a variety of times.

Preparation

You are expected to be prepared for your clinical experiences. Often this preparation will include chart research or other activities prior to direct client care. For chart research and other activities in the clinical area other than your actual experience, you are expected to wear your nursing student uniform or appropriate street clothes, and your picture identification tag. Some areas may require lab coats. In addition, you should identify yourself and your purpose to staff in the area. When doing chart research you should not take charts out of the charting area.

Attendance

Clinical experience is an integral part of the program. It is expected that you will participate in all clinical experiences in your courses. It is recognized that absence may be unavoidable (e.g., illness), and policies are in place to deal with this. Students who have been absent from clinical due to health problems may be required to produce a medical certificate stating they may return to clinical. Avoidable or repeated absence is not acceptable and could impact on your completion of the course. You should be aware that employers often ask about attendance when seeking references.

In cooperation with agency staff, your client assignments will generally be selected prior to the clinical experience. If illness or other unavoidable circumstances prevent you from being present for clinical experience, it is important for you to let people know as soon as you can before you are scheduled to begin your clinical experience. Unless your instructor otherwise informs you, you should notify both the instructor and the clinical practice area that you will be absent.

Professional Conduct

Ensure you report to your instructor and appropriate staff when you arrive before beginning your assignment, and continue to collaborate with both the instructor and appropriate staff during your experience.

If you are in an institutional setting, you must report to the appropriate RN/RPN regarding your assigned clients before you leave the clinical area for any reason (e.g., coffee, end of experience, going out of the area with a client). In community settings, the instructor (if on site) or appropriate staff must be advised of your whereabouts.

In your role as a student, you may NOT act as a witness for legal documents such as wills, surgical consents, or release of hospital responsibility.

Medication Exam Safety

Safe medication administration is an essential component of providing safe care. The College of Nursing has a Medication Exam Process for Clinical Courses to support safe medication administration by students.

Students must pass a course specific standardized medication calculation and knowledge exam in each clinical course where they are expected to administer medications.
Agency Manuals and Policies
Most agencies have manuals dealing with policies, procedures, and charting specific to that particular agency. You should familiarize yourself with the manuals in the area of your clinical experience, and follow policies and procedures of the agency in which you are having experience. If in doubt, refer to your instructor.

Charting
Through your classes you will become familiar with the principles of documentation. During your clinical experience, you must follow charting policies of that specific agency, which includes use of agency specific abbreviations. When charting, use the letters USask NS (Nursing Student) after your name when it is necessary to identify your designation.

Performance of Technical Skills
Clinical experience provides an opportunity for you to develop your nursing skills and knowledge. While you are encouraged to seek learning experiences, you must not perform any procedure for which you do not have adequate preparation.

Year 3 & 4 students may perform certain RN Specialty Practices under direct and continuous supervision of an instructor or RN/RPN who is certified for the procedure if you have been provided with theoretical background. You must not perform ANY procedure for which you do not have adequate preparation.

Clinical ID Badges
Students are required to wear an approved clinical ID badge in labs and clinical areas through the duration of their program. The College of Nursing purchases one clinical ID badge per student and there will be a charge if replacements are needed. The clinical ID badge is the property of the College of Nursing and thus must be returned to the College of Nursing if requested.

Uniforms
Uniforms will be required for all lab and clinical experiences unless otherwise specified. Please refer to your acceptance letter and our website for information about Uniform Purchase.
